

To all the dogs that have fed my soul...
For the feast of love you have always served up,
With a wag and a smile.

We host an open house on occasion so that you may visit, as long as we do not have young pups in the house. Please understand that we are not a large kennel facility and that this is only for the protection of the puppies. Parvo virus is a real threat to the lives of young puppies that are not fully vaccinated. Canine Parvo Virus is a deadly communicable disease. It is transferred on shoes clothes, tires and hands and can easily be picked up and carried on the soles of your shoes without you knowing that you've been exposed! So please be understanding about our no visitor policy, it is only for the safety of our pups! Please email us if you are interested in visiting during an open house and I will send you information. ([email me](#))

When planning a trip to our home, either for a visit or to pick up your new puppy, we ask that you not visit other places where dogs have been prior to visiting. This virus is very persistent and difficult to get rid of...Parvo can live in the soil for up to 3 years! ([parvo information](#))
